Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1 through 7 are pending. Applicant's claim to priority the date of April 25, 2003 (Japan 2003-121103) is acknowledged.

Claim Rejections - 35 USC § 102

2. The following are quotations of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent, or

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 5, and 6 are rejected under 35 U.S.C. 102(a) and (e) as being anticipated by Nomura et al., US 6,387,908 B1, May 14, 2002 ('908), and its application 09/508026 filed May 5, 2000.
4. Claims 1 and 2 are drawn to sodium and potassium salts of (2S,3S)-3-[[[(1S)-1-isobutoxymethyl-3-methylbutyl]carbamoyl]oxirane-2-carboxylate, respectively. 908' teaches the same epoxysuccinamide derivative (Table 1, Column 9, Compound No. 87) and further teaches these alkali metal salts reciting "*The epoxysuccinamide derivative of the invention can be employed in the form of a physiologically acceptable salt. For example, in the case that R¹ is a hydrogen atom and X is --O--, it forms a salt with an alkali metal (e.g., sodium or potassium), an alkaline earth metal (e.g., calcium), or an organic amine (e.g., triethylamine or pyridine).*".

Art Unit: 1625

5. Claims 5 and 6 are drawn to organic ammonium salts of (2S,3S)-3-[[[(1S)-1-isobutoxymethyl-3-methylbutyl]carbamoyl]oxirane-2-carboxylate. Claim 5 is drawn to salts formed with the general class "organic amine", while claim 6 is drawn to organic amines of the formula (R1)(R2)(R3)N wherein R1, R2, and R3 can be linear chain alkyl or R2 and R2 can be combined in a 5 to 7 member ring containing nitrogen. Clearly, '908 teaches the same epoxysuccinamide derivative (Table 1, Column 9, Compound No. 87) and further teaches these same organic ammonium salts reciting "*The epoxysuccinamide derivative of the invention can be employed in the form of a physiologically acceptable salt. For example, in the case that R¹ is a hydrogen atom and X is --O--, it forms a salt with an alkali metal (e.g., sodium or potassium), an alkaline earth metal (e.g., calcium), or an organic amine (e.g., triethylamine or pyridine).*"
